Take Advantage of our Profit-Driving Solutions

SalesPad® for BC

Take full command of every quote, order, and invoice throughout your Microsoft Dynamics 365 Business Central system. Spot costly errors before they impact your margins, simplify your approval process, and keep orders flowing with a streamlined workflow automation engine.

Profit Max Platform™

Leverage powerful, distribution-focused AI to analyze customer trends, optimize pricing, and master gross margin variance analysis. This solution helps you uncover margin leaks and early signs of customer churn, empowering your team to take proactive steps to protect profitability and address the underlying causes before they escalate.

Unlock the Power of Profit Maximization for Microsoft Dynamics 365 Business Central

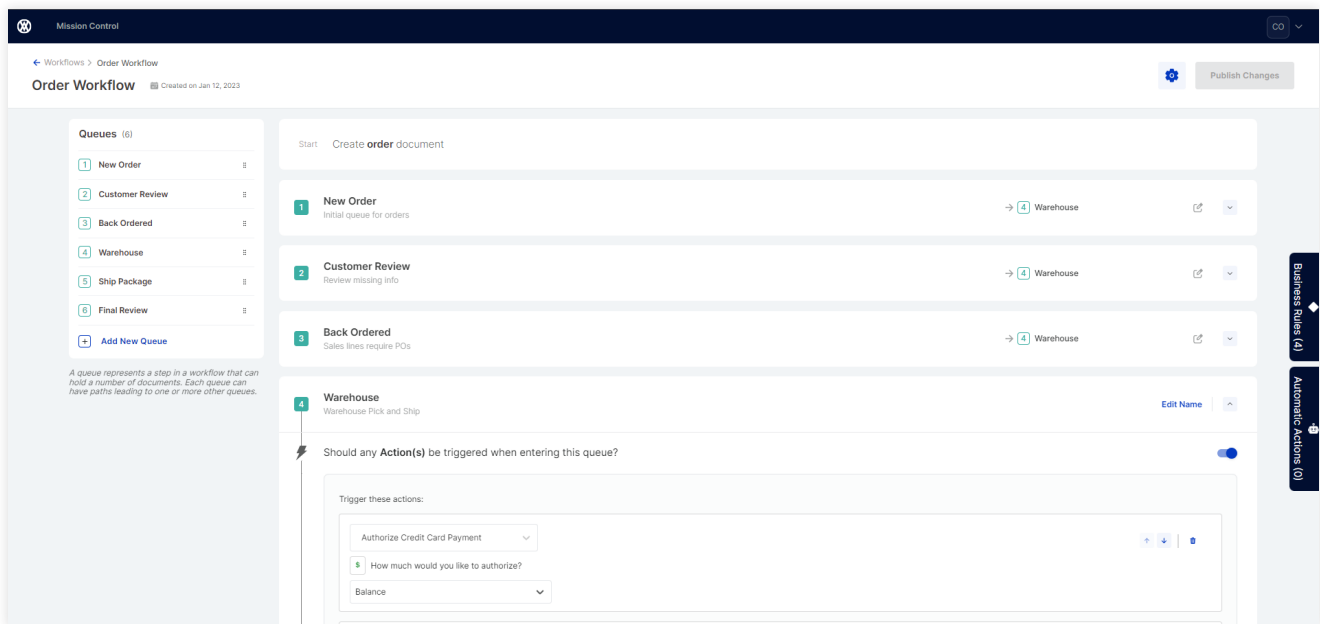

SalesPad® for BC and Profit Max Platform™ provide the flexibility to optimize order profitability based on your unique requirements.

- Automate order scanning to pinpoint margin erosion and view your least profitable orders in real time.
- Proactively optimize workflows and eliminate error-prone orders to stop profit leaks at scale.
- Leverage billions of data points to identify margin trends and unseen profit gaps that impact your bottom line.

Integrations

Cavallo supports BC users with seamless integrations to make the order process as productive as possible.

- Custom Fields
- Credit Card Processing

"The level of customization of SalesPad for BC's workflows means you're getting the exact functionality your business needs. Users have a much better understanding of how to put workflows together instead of relying on an expert within the ERP."

– Robb Delprado, Microsoft MVP
