

SALESPAD® MOBILE

Unleash Success Anywhere, Anytime

Everything You Need, On Your Phone

SalesPad® Mobile makes it easy to manage sales and customer data from mobile devices, so distributors can keep business running smoothly—no matter where you are. Carry the full power of our distribution management solution in your back pocket. Compatible with Apple and Android mobile devices, SalesPad Mobile puts everything you need to successfully run your business right in your hand. Easily manage your sales, customer, and inventory data from wherever the day takes you.

SalesPad® Mobile in Action

Keep an eye on your operations and get work done when you're away from your home base. Follow along throughout the entire order fulfillment process from your phone—access customer information and accept payments, sign documents, browse your inventory with ease, and track each shipment's progress until the moment it reaches your customer's door.

You don't have to stay behind a desk to experience the power of SalesPad. With SalesPad Mobile, you can keep things moving whether you're traveling or working on the shop floor.

Key Features

- **Manage sales documents:** Easily create and update orders from your mobile device. Enter new sales and allocate inventory.
- **CRM management:** Create notes and interactions on customers and contacts and check in on customer relationships while away from the office.
- **Work offline:** Data entered while offline is saved and updated once your device is back online, so you can close deals on the road.
- **Track shipments and drivers:** Keep track of order shipments and drivers with location visibility.
- **Accept payments and signatures:** Customers can sign and pay for orders directly on your mobile device.
- **Map navigation and directions:** Access navigation and directions for travel to customer sites or to deliver orders.
- **Catalog-style item selection:** Easily browse items for simplified item selection.
- **Print receipts:** Print from your mobile device to a supported printer.
