SHIPCENTER

Shipping Made Simple

Bring Your Shipping Data under One Roof

SalesPad® ShipCenter is an all-in-one shipping product that supports parcel and LTL shipping methods while uniting all shipment and tracking data under one easy-to-use platform. Spend less time clicking through multiple screens and jumping between systems to hunt down tracking information. Accelerate your entire shipping process from order entry to invoice collection to tracking a package—all with a single solution—and get more orders out the door faster.

Say goodbye to issues like

- Shipping via different mediums is time-consuming

- Shipping management requires input from multiple systems

- Shipping tracking is fragmented and unreliable

- Customers have limited visibility into the status of their shipments

Complete Visibility

Instantly see all of your shipping and tracking data in one easy-to-read screen

ShipCenter in Action

Ship more efficiently and accurately than ever before by consolidating your entire shipping operation into one user-friendly system. Once you've picked, packed, and shipped your product, ShipCenter automatically generates all the necessary shipping and tracking information in your sales documents. Via robust workflows, you can quickly send tracking information and invoices to your customers as well, providing them with total visibility over an order's progress.

Key Features

- Choose from a long list of supported carriers
- Quote and compare rates from supported parcel carriers
- Create custom packages and reusable templates
- Connect scales to weigh packages
- Coordinate your shipping with the help of specialized scripts and plugins

"The shipping module's great. It works hand-in-hand with SalesPad. Once I have the order fulfilled, I can print the label within 25 seconds. Simply scan the document, enter in shipment information, package template, weight—it's as easy as that"

- Nick Padgitt, Order Fulfillment Manager at Handi-Craft co.
