☎ 616-245-1221

Your Operational ERP system should give you the tools and insights necessary to manage your inventory with success. If you're feeling limited and trapped rather than well-equipped and empowered, it's time for an upgrade.

We're always looking for better ways to give our customers the functionality they need to get the job done, and our collection of add-on products reflects that. SalesPad Desktop's ever-growing list of add-ons includes solutions for shipping, barcoding, payment processing, and more.

SalesPad Desktop grows with you, so you can rest easy knowing that you won't have to start at square one if you outgrow your system.

1.

One end-to-end solution

If you're operating on multiple platforms to manage inventory when you could be working off of one Operational ERP system, SalesPad Desktop is the solution you're looking for. Import your shipment data, accept payments, and employ EDI with ease. With SalesPad Desktop, you can modify customer info, sales documents, or inventory with just a few clicks. Imagine what you could accomplish by managing sales orders or shipping products quickly and reliably — all in one place.

2.

The functionality you crave

So, you're managing your inventory on Microsoft Dynamics GP. Maybe you'd even consider yourself something of a Dynamics GP veteran. But let's face it — your distribution business is demanding more than your current Operational ERP system can handle. With SalesPad Desktop, you get real-time visibility into all of your inventory, giving you the functionality your business needs in order to thrive.

Empowerment for your sales team and customer service representatives

More visibility means your sales team gets access to the data they need in order to properly forecast future business. They'll also have the ability to create sales stages that are based on reliable data and probability. SalesPad Desktop is user-friendly and intuitive — your CSRs can say goodbye to digging through irrelevant information to solve customer problems.

Pain-free implementation and a support team you can count on

We all know that implementation is no light task. That's why we've built stellar support and implementation teams made up of implementation specialists and customer service pros who are committed to making your SalesPad Desktop implementation process experience the best it can be. We work alongside you to get to know your business's needs and how SalesPad Desktop fits into your overall game plan.

Software tailored to fit your needs

Every company is different. At SalesPad, we realize that you need a team that knows the ins and outs of your company. We become experts on your business so that you can be confident that your Operational ERP system has the right functionality to meet your unique needs.
