# FEDEX SHIP MANAGER

## Smoother shipping operations

---

### What is FedEx Ship Manager?

This integration empowers users to track and manage shipping operations while keeping customer, inventory, and shipping data easily accessible under one program. This integration streamlines the fulfillment to shipping process transition, and ensures accuracy by integrating data between your complete distribution operations solution and FedEx Ship Manager — no need to switch screens or open a new application.

### You should use FedEx Ship Manager Integration if:

– You're using FedEx Ship Manager as your shipping solution

– You find yourself spending lots of time manually entering shipping information

– Processing shipments is time-consuming and frustrating

### What does it look like in action?

Leverage complete visibility and control over every part of your shipping processes without the hassle of having to piece together information from multiple systems. Users can import shipment data, process shipments, and with the help of Cavallo's Workflow and Profit Manager, set up automation to write costs and tracking numbers on sales orders without having to lift a finger. This feature also makes batch shipping a snap — process multiple shipments at once without sacrificing accuracy.

### With FedEx Ship Manager Integration, you can:

– Create and print shipping labels

– Track shipments

– Process multiple sales documents in a single step

– Monitor ready-to-ship orders and prioritize them according to your needs

– Click and scan order numbers to import orders into Fedex ShipManager

– Automatically update shipping information, freight numbers, and tracking information on sales documents for more accurate freight costs and visibility into order-based profitability

### How can I expand my software tool kit?

FedEx Ship Manager Integration is just one tool in your distribution software tool kit. Build out your complete distribution software solution with Cavallo's additional features and modules — including next-level functionality like automated tasks and workflow, CRM tools, EDI, barcoding, and plenty more. Elevate every process of your distribution management, from selling to order fulfillment to shipping and payment collection, and accelerate their efficiency by uniting them under one powerfully flexible solution.
