CAVALLO®

SHIPPING

Shipping made simple, no matter how you do it

What is Cavallo Shipping?

Cavallo Shipping is an all-in-one shipping feature that supports parcel and LTL shipping methods while uniting all shipment and tracking data under one easy-to-use platform. Instead of spending time tracking down shipping information or hopping systems, use one solution to manage your entire shipping process. From order entry to invoice collection to tracking a package once it's on the road, Cavallo Shipping has you covered.

You should use Shipping if:

- Your shipment management requires input from multiple systems
- Shipment tracking is fragmented or unreliable
- Your company ships in many different ways, including parcel, LTL, and drop-shipping

What does it look like in action?

By bringing all your shipping operations and related data under one roof, you'll be able to ship more efficiently and more accurately than ever before. Once you've picked, packed, and shipped your product, Cavallo Shipping will automatically generate all the necessary shipping and tracking information to your sales documents. And with the help of your well-designed workflow, tracking information and invoices can be quickly sent to your customers. This feature also gives complete visibility over the package's progress, whether it's ready-to-ship or it has already been sent out for delivery.

With Cavallo Shipping, you can:

- Quote and compare rates from supported LTL and parcel carriers
- Create custom packages and reusable templates
- Choose from a long list of supported carriers
- Connect scales to weigh packages
- Coordinate your shipping with the help of specialized scripts and plugins

How can I expand my software tool kit?

Cavallo Shipping is just one tool in your distribution software tool kit. Build out your complete distribution software solution with Cavallo's additional features and modules — including next-level functionality like automated tasks and workflow, CRM tools, EDI, barcoding, and more. Elevate every process of your distribution management, from selling to order fulfillment to shipping and payment collection, and accelerate their efficiency by uniting them under one powerfully flexible solution.
