

CREDIT CARD PROCESSING

Extend your transactional toolkit

Integrated, Automated Payment Processing for Business Central

Grant your customers greater payment flexibility without sacrificing safety and security with Cavallo[®] Credit Card Processing, powered by Nodus PayFabric. With this module in hand, users will drastically reduce document processing time by automating payments and making collections simple.

Cavallo Credit Card Processing extends users' selling capabilities to include all their payment processing needs. Leverage Nodus PayFabric's features to securely accept credit card payments in person and online, access transaction history for any customer, and save payment information for faster future transactions directly in Business Central.

Powered by **PayFabric**

Cavallo Credit Card Processing leverages the security and flexibility of Nodus PayFabric[®], one of the world's premier providers of cost-effective, scalable processing solutions. Businesses of all types and sizes can keep customer data safe and process more payments faster with the help of this PCI-compliant provider.

"My experience with PayFabric[®] is wonderful. It saves us so much time—it is amazing...There's nothing better."

— Gail Perry, Office Manager at Handi-Craft Co.

Supported Transaction Types

-  Card-Not-Present
-  EMV
-  Cash Receipt
-  Card-Present

Key Features

- Use workflow to take payments on a document and automate authorizations, captures, and sales
- Easily view payment status of each document to determine if it needs payment, is partially authorized, is fully authorized, or fully paid.
