

CONFIGURATOR

Customization to match customer needs

What is Configurator?

SalesPad® Configurator is a tool which users can implement to create configurable items according to customer specifications upon ordering. This configuring capability minimizes time spent entering orders, with options for users to craft configurations of varying complexity, depending on the needs of their business.

You should use Configurator if:

- You have a lot of variations among your products
- You want an automated solution to simplify your order management process
- You're interested in a dynamic, easy-to-use tool

What does it look like in action?

Setting up configurations is simple, and allows you to enter customer orders with ease. Choose from a list of options for each item, such as color, size, and so on, according to customer specifications, and the selection will be saved in a line of code. This tool also allows for full visibility of each available configuration per item, as well as the ability to test the configurations without placing an actual order.

How can I expand my software tool kit?

Configurator is just one tool in your software tool kit. Build out your complete distribution software solution with Salespad's additional features and modules — including next-level functionality like automated tasks and workflow, CRM tools, EDI, barcoding, and more. Elevate every process of your distribution management, from selling to order fulfillment to shipping and payment collection, and accelerate their efficiency by uniting them under one powerfully flexible solution.
