DISPATCH

Expert route tracking and management

What is Dispatch?

SalesPad® Dispatch is the ultimate organization tool to manage your drivers and vehicles. Create, assign, and track routes and their collection of stops within Dispatch—which can be done manually, created from a sales document, or automatically generated from one of SalesPad's integrations.

You should use Dispatch if:

- You spend a lot of time tracking down orders being shipped

- You want to optimize route schedules

- You're interested in comprehensive organization for your routes, drivers, and vehicles

What does it look like in action?

After manually creating a route or automatically generating one, users can tie calendar appointments to each stop in the route with the corresponding vehicle and driver. Further improve your route management across your entire organization by utilizing the Disptach Board feature to optimize multiple schedules.

How can I expand my software tool kit?

Dispatch is just one tool in your software tool kit. Build out your complete distribution software solution with Salespad's additional features and modules — including next-level functionality like automated tasks and workflow, CRM tools, EDI, barcoding, and more. Elevate every process of your distribution management, from selling to order fulfillment to shipping and payment collection, and accelerate their efficiency by uniting them under one powerfully flexible solution.
