

EDI

Integrated product fulfillment, simplified

What is SalesPad EDI?

Powered by SPS Commerce, our EDI add-on streamlines the exchange of information between companies, and allows users to stay competitive with big-box retailers. SalesPad® EDI brings you into a trading network that connects more than 1,500 companies worldwide. From custom EDI document types to unique business mappings to easily adaptable workflows, EDI works with you to do better business.

You should use EDI if:

- You're a smaller business looking to expand your market access by working with larger retailers
- Drop-shipping is a frequent function within your operations
- You want to stay up-to-date and competitive in your field as your company grows

What does it look like in action?

This module lets you easily exchange data between your company and the outside world. This process is a difference-maker when managing a multi-channel sales system, where you're pulling in many orders from different outlets. Easily automate tasks that require interaction with third parties or other integrations to eliminate opportunities for human error. EDI also opens doors for smaller businesses to work with larger customers with full visibility and minimized opportunity for errors, so you can take your selling power to the next level (and the one after that).

Which EDI package is right for me?

EDI easily adapts to your business — no matter the size or industry. For users looking to work with 1-10 trading partners, SalesPad's Essentials package has you covered. For those looking to do business with 11 or more trading partners, SalesPad's Professional package is your perfect fit.

With EDI, you can:

- Avoid translation errors by using retail-standard XML
- Create your own EDI document types
- Design a schedule for receiving
- Integrate with your workflow to speed up processes
- Seamlessly share data without worry about time zones, wait times, or out-of-date inventory data

How can I expand my software tool kit?

SalePad's EDI offerings are just one tool in your distribution software tool kit. Build out your complete distribution software solution with SalesPad's additional features and modules — including next-level functionality like automated tasks and workflow, CRM tools, and barcoding to accelerate their efficiency by uniting them under one powerfully flexible solution.
