SALESPAD®
BY CAVALLO

EQUIPMENT MODULE

Efficiently manage your equipment inventory

What is Equipment Module?

With SalesPad® Equipment Module, users can quickly and easily track the sales and service history of specific, serialized items in their inventory. Additional plugins are available as well, with capabilities to efficiently assign equipment, create rental orders, and add or update rental items.

You should use FedEx Integration if:

- You spend a lot of time searching for specific equipment

- You're looking to better organize your inventory of serialized equipment

- You want to quickly, easily, and efficiently manage your equipment inventory

What does it look like in action?

SalesPad Equipment Module is built into our existing software, so its setup and usage within SalesPad is simple and user-friendly. Equipment search and lookup allow you to fill out any one of a variety of fields to find the specific item you're looking for. To add equipment, simply enter the serial number and assign it to a customer, and keep all your equipment organized via the Equipment Card function.

How can I expand my software tool kit?

SalesPad's Equipment Module is just one tool in your software tool kit. Build out your complete distribution software solution with Salespad's additional features and modules — including next-level functionality like automated tasks and workflow, CRM tools, EDI, barcoding, and more. Elevate every process of your distribution management, from selling to order fulfillment to shipping and payment collection, and accelerate their efficiency by uniting them under one powerfully flexible solution.
