SALESPAD MOBILE

Bring your business on the road

What is SalesPad Mobile?

SalesPad® Mobile allows you to carry the full power of our distribution management solution in your back pocket. Compatible with Apple and Android mobile devices, SalesPad Mobile takes you off of the sidelines and into the spotlight by allowing you to easily manage your sales, customer, and inventory data from wherever the day takes you.

You should use SalesPad Mobile if:

– Sales personnel need easy access to customer info and order entry while on the road

– You want clear visibility over your operations, even while working from home

– Drivers need to be able to track their progress while carrying a shipment

What does SalesPad Mobile look like in action?

SalesPad Mobile lets you keep an eye on your operations and get work done when you're away from your home base. Follow along throughout the entire order fulfillment process from your phone; access customer information and accept payments, sign documents, browse your inventory with ease, and track each shipment's progress until the moment it reaches your customer's door.

With SalesPad Mobile, you can:

– Manage quotes, orders, invoices, and returns

– Make notes on customers and contacts

– Work offline

– Check on deliveries

– Access map navigation and directions

– Browse through catalog-style item selection

– Print or email receipts

How does SalesPad Mobile help me take my on-the-go operations to the next level?

Not only does SalesPad Mobile offer the strength of your normal operating system; it's designed to be a flexible solution, primed for whatever circumstances come your way. Our mobile solution is compatible with a wide range of accessories, including barcode scanners and printers, so you never have to furiously search for the right item or wait for someone at the back office to forward proper paperwork. You have the power to do it all, and do it all well.
