

API

All your information, easily accessible

What is API?

SalesPad® API is a tool with which users can quickly pull information out of SalesPad and input new information from third-party systems with ease. API's capabilities include creating a new customer, retrieving customer information, creating a sales document, and more. Leverage your existing code to integrate new applications and sync all your business information.

You should use API if:

- You're interested in modifying data automatically
- You have engineering resources and want to build an integration with SalesPad
- You want to maximize your efficiency and save time through automation

What does it look like in action?

SalesPad API offers efficient organization and time-saving capabilities to keep all your business's information clear and updated. With the ability to implement any or all of API's tools, you can customize this product to meet all the needs of your business. The process of creating and updating customer information, sales documents, and sales line items is simplified, as is creating workflows to share information within your company.

How can I expand my software tool kit?

API is just one tool in your software tool kit. Build out your complete distribution software solution with Salespad's additional features and modules — including next-level functionality like automated tasks and workflow, CRM tools, EDI, barcoding, and more. Elevate every process of your distribution management, from selling to order fulfillment to shipping and payment collection, and accelerate their efficiency by uniting them under one powerfully flexible solution.
