BLUE MOON INTEGRATION

Ultimate automation and efficiency

What is Blue Moon Integration?

Streamline your business operations with SalesPad® Blue Moon Integration. Maximize your efficiency and minimize human error through automating processes like releasing documents, purchase orders, and inventory items.

You should use Blue Moon Integration if:

- You're looking to automate your business operations and save time

- You want to improve communication and synchrony across your team members

- Your company would benefit from a customizable organization tool

What does it look like in action?

With SalesPad's integration, unlock time-saving features from Blue Moon like Auto Release. Users can customize Auto Release to their liking by enabling notifications every time a sales document is released to a specific queue, a purchase order is saved, or an item number is created or updated. Blue Moon Integration also allows users to track the status of a sales document and lock it while it is being processed, as well as edit fulfillment options for sales documents. Leverage total control, customization, and visibility over all aspects of your business when you implement Blue Moon Integration.

How can I expand my software tool kit?

SalesPad's Blue Moon Integration is just one tool in your software tool kit. Build out your complete distribution software solution with Salespad's additional features and modules — including next-level functionality like automated tasks and workflow, CRM tools, EDI, barcoding, and more. Elevate every process of your distribution management, from selling to order fulfillment to shipping and payment collection, and accelerate their efficiency by uniting them under one powerfully flexible solution.
