KWIKTAG INTEGRATION

Business-wide organization

What is Kwiktag Integration?

This SalesPad® KwikTag Integration brings KwikTag's incredible document management system to SalesPad, helping to ensure total organization of your business. Coordinate files and documents across multiple departments and business processes, and ensure that no important information is lost.

You should use Kwiktag Integration if:

– You want to improve your overall organization of documents, departments, and business processes

– You spend a lot of time searching for important information

– You're looking for a solution that integrates seamlessly with Microsoft Dynamics GP

What does it look like in action?

Kwiktag Integration allows you to sync and organize key files across your business, including customer information, sales documents, purchase orders, vendors, and more. The integration is organized into two modules: Sales—which includes customer information and sales documents—and Purchasing—which houses orders and vendor information. You can also avoid manually placing physical barcodes on documents by utilizing the Scripting feature, which does so automatically.

How can I expand my software tool kit?

SalesPad's KwikTag Integration is just one tool in your software tool kit. Build out your complete distribution software solution with Salespad's additional features and modules — including next-level functionality like automated tasks and workflow, CRM tools, EDI, barcoding, and more. Elevate every process of your distribution management, from selling to order fulfillment to shipping and payment collection, and accelerate their efficiency by uniting them under one powerfully flexible solution.
