

PROFIT ANALYTICS™

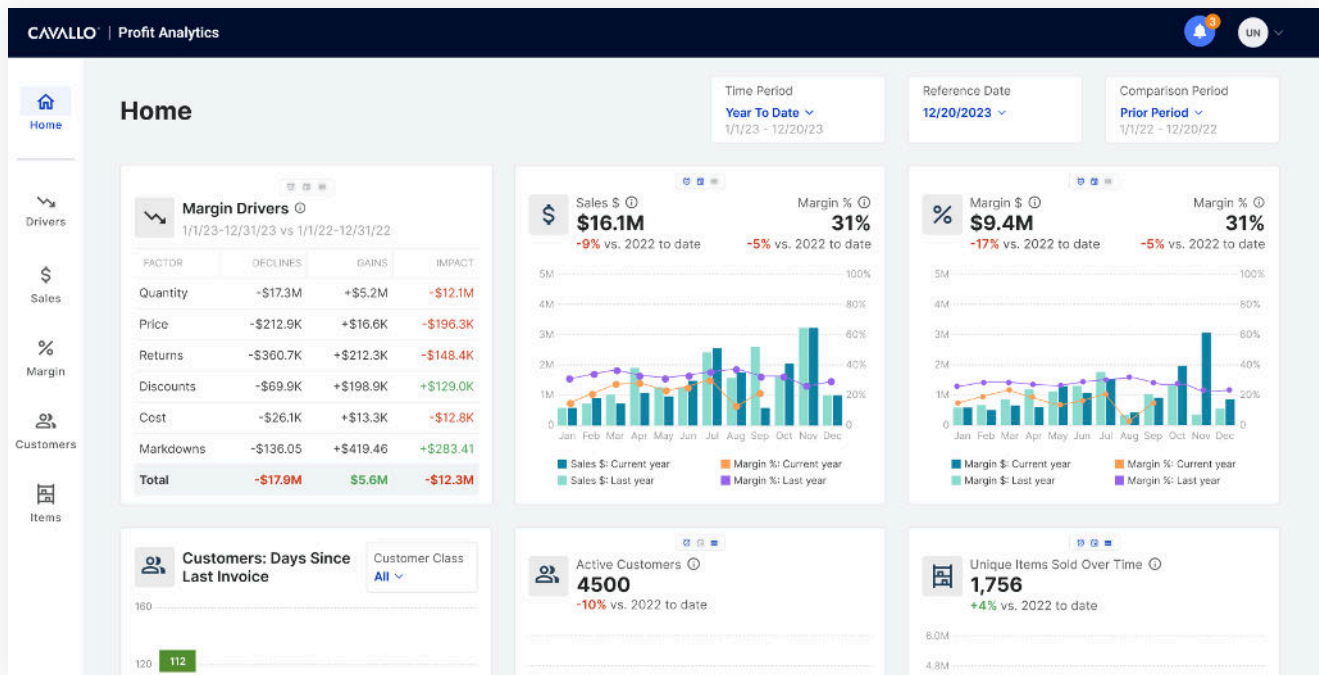

Unleash the Power of Your Data for Enhanced Profitability

For modern businesses, particularly product-centric brands and distributors, the challenge of tapping into massive volumes of data for effective decision-making is monumental. Profit erosion and its causes are impossible to identify and rectify due to the sheer volume of information within your ERP system. With businesses like yours leaking margin on a third or more of your orders, the need for a robust solution is clear.

Enter Cavallo® Profit Analytics™, a revolutionary tool that harnesses your data to the surface where you're leaking margin, why, and what you need to do to stop it.

Transforming Data into Actionable Insight

Profit Analytics empowers users of Microsoft Dynamics GP or 365 Business Central (BC) to fully unlock the power of their data, transforming it into a strategic asset. Unlike traditional tools that require expensive, highly-skilled resources to custom-build reports, Profit Analytics provides sophisticated pre-structured visualizations that deliver immediate value, instantly revealing insights into your margin performance. You'll get more than just numbers, you'll get a deep understanding of the dynamics affecting your profitability and what corrective actions are needed.

See all of the data that matters to you (and nothing that doesn't) laid out in an easy-to-understand format

Targeted Profit Intelligence for Your Decision-Makers

With Profit Analytics, actionable insights that would be nearly impossible or too expensive to uncover with in-house talent or third-party consulting resources are readily accessible to your Executives, Sales Leaders, and Heads of Marketing, Operations, and Finance. They'll be empowered to make more informed decisions, steering your organization toward its full margin potential.

Key Benefits and Rapid ROI

Profit Analytics excels in delivering immediate value through its sophisticated, pre-built analytics, offering insights into areas such as KPI trend reporting, variance analysis, customer analytics, and item analytics. This suite of tools enables businesses to:

- Identify gross margin leaks in real-time
- Proactively address churn risks to secure margin contributions
- Monitor and understand margin performance over time
- Pinpoint and address the root causes of margin erosion
- Determine corrective actions to reclaim lost profits

Answering Critical Profit Questions

Mining through years of invoice data, Profit Analytics enables detailed analysis with robust filtering and segmentation across multiple dimensions and time periods. Businesses can gain insights into:

- The reasons behind profit decline at a line-item level
- Customer sales trends, identifying those with significant gains or losses
- The risk of customer churn and its impact on profitability
- SKU performance, distinguishing between top sellers and underperformers
- Variations in profit, sales, and margin over time

“Cavallo® provides much better visibility into order profitability than BC does on its own. We are stopping low margin orders that used to get through.”

- Tyler Norris, Toolmatics

Complete customer analytics means that you can track churn and proactively prevent margin loss

Key Features for Comprehensive Profit Analysis

Profit Analytics' powerful features are designed to uncover margin leaks and their underlying causes.

- **Sophisticated variance analysis** to reveal areas of margin leakage and their root causes
- **KPI trend analysis** for tracking sales and margin metrics over time, with segmentation and filtering for more granular analysis
- **Comprehensive customer analytics** for tracking activities, assessing churn risk, measuring how churn affects profitability, and more
- **Item analytics** to see which SKUs have the greatest positive or negative impact on profits
- **AVA, a “profitability co-pilot”** that makes insights truly actionable by auto-suggesting steps that can be taken to improve margin performance
- **Easy sharing of insights** to allow the entire organization to collaborate to boost profitability
- **Proactive notifications** of items sold at an increased unit cost, and configurable notifications when a customer has not purchased in X days or your sales or margin have exceeded or dropped below Y thresholds

With Cavallo Profit Analytics, you can break down the obstacles associated with massive data sets, exploiting your ERP information for strategic advantage. Your leaders will have the actionable insights they need to drive profitability and build a more valuable business.

Item Number	Item Description	↓ Margin \$	Margin %	Quantity	Cost of Goods Sold	Sales \$
TPMB463616	Teal Polyester Murphy Bed	\$64,528	33%	4038	\$128,846	\$193,375
